Ganesh Singare

Backend Engineer | 3+ Years Experience | Java, Spring Boot, Microservices, REST APIs

+91-8552926188 | geniussingare@gmail.com | linkedin.com/in/geniussingare | github.com/geniussingare

Professional Summary

Backend Engineer with 3+ years of experience designing and shipping **scalable, production-grade Java systems** for enterprise and **AI-integrated** applications. Skilled in **microservices architecture**, **high-throughput REST APIs**, and **secure, cloud-deployed services**. Comfortable owning a feature end-to-end – from schema design through API implementation, testing, and deployment – with a strong focus on **performance, reliability, and clean architecture**.

Technical Skills

Languages: Java, JavaScript, SQL

Backend: Spring Boot, Spring MVC, Spring Data JPA, Hibernate, REST APIs, Microservices Architecture

Frontend: React.js, Redux, Next.js

Databases & Caching: MySQL, PostgreSQL, Microsoft SQL Server, Redis

Cloud & DevOps: AWS (S3), Docker, Git, Maven

Security: Spring Security, JWT, OAuth2

Testing & Tools: Postman, JUnit, Testcontainers

Core Concepts: OOP, Data Structures & Algorithms, Multithreading, Distributed Systems, System Design, RESTful API Design, Scalability, Performance Optimization, Agile/Scrum

AI/ML: RAG-based Systems, LLM Integration, AI-assisted Development

Work Experience

Associate Software Developer
Novatech Software Pvt. Ltd. *June 2023 – Present*

– **AI Integration & RAG Support** | *Java, Spring Boot, REST APIs* 2026

- Designed and implemented a **RAG-based AI integration** for contextual requirement analysis, improving response relevance for end users.
- Built **REST APIs** for AI request handling and context-aware data retrieval, consumed by downstream services.
- Architected a **scalable proxy layer** supporting multiple AI providers, decoupling business logic from any single vendor.

– **Test Management Module** | *Java, Spring Boot, JPA/Hibernate* 2025

- Designed and built **REST APIs** for managing test cases, execution workflows, and test steps end-to-end.
- Implemented an **execution engine** with step-level tracking and full history for auditability.
- Integrated a **defect-tracking system** directly into test workflows, reducing manual handoff between QA and engineering.

– **Traceability Management Module** | *Java, Spring Boot, JPA/Hibernate* 2025

- Designed normalized **entity relationships** linking requirements, test cases, and issues for end-to-end traceability.
- Built **dependency tracking** and impact-analysis features to flag downstream effects of requirement changes.

– **File Storage Service** | *Spring Boot, MySQL, AWS S3, JWT* 2024

- Built a **scalable file storage service** on **AWS S3** for document upload, retrieval, and versioning.
- Secured all endpoints with **JWT-based authentication** and role-based access control.

Projects

E-Commerce Platform (End-to-End Shopping Application) | *Java, Spring Boot, React, MySQL*

– Built a **full-stack e-commerce application** supporting product catalog, cart, and order workflows.
– Designed **REST APIs** for user, product, and order management with clear separation of concerns.
– Implemented **JWT authentication** for secure, stateless access control.
– Optimized **database schema and queries**, improving response times under load.

Achievements

Cheers to Peers Award – Jan 2025
Recognized for exceptional performance and consistent delivery.

Education

B.Tech in Computer Science and Engineering, DBATU *2020 – 2023*
CGPA: 8.9/10

Certifications

Full-Stack Development (MERN) – 100XDev
Android Application Development – Internshala
